Division Chair: Dr Stephen Takach; set@unm.edu

Course Goals:

Learn the fundamentals of game design. Students will learn how to discuss and analyze games from different perspectives, and use board games to learn about design and iteration.

Learning Objectives:

By the end of the course, students will:

- (1) Demonstrate the development process of prototyping & iteration
- (2) Analyze and design game mechanics that support other mechanics and experiences
- (3) Be able to critically discuss games and their mechanics
- (4) Be able to write useful and detailed design documents
- (5) Describe the various roles and jobs in game development and the game industry

Course Outline:

This course will alternate between projects and a more traditional structure. There will be three projects where students make, test, and refine a game. In-between the projects, we'll discuss the theory behind game design and talk about the game industry, with conventional homework and discussions. The course will meet periodically on Zoom and be supplemented with recorded lectures and examples, and will use Learn for homework uploads and discussion boards.

Materials:

You *must* have:

- Internet Access, for UNM Canvas, Youtube, and other programs.
- Word processing software (MS Word, Open Office, Pages, etc)
- Steam Account (<u>https://store.steampowered.com/</u>)
- Notebook

This course does not have a textbook. Instead, you'll be expected to independently play through four games throughout the semester. Three of these games, listed below, are required for everyone. You'll have to choose two additional games from a list given later in the semester, with an array of options spanning various genres, and write a paper analyzing many of the design decisions in the game. If there is a financial hardship in acquiring these games, please come talk to me during office hours or email me at ianburch@unm.edu

Assignments will be both given in person and posted on UNM Canvas (<u>https://canvas.unm.edu/</u>) Homework assignments will typically be due either in one class session or a week after being assigned. Larger assignments and projects will be broken up into smaller pieces (such as drafts or rough versions) each with their own due dates, and the whole project given at least two weeks in advance.

Late Work / Absences:

Please email me <u>ianburch@unm.edu</u> if you're going to be late on an assignment and I'll generally give an extension. Unexcused late work may be docked points at my discretion, especially collaborative work that puts more of a burden on fellow students. Any assignments not submitted by the end of the semester (12/17) will be graded 0.

Expectations:

Students are expected to conduct themselves in a professional and collegial manner. This course will feature discussions, feedback, and group work. Be respectful and polite of others ideas, work, and contributions. During Zoom meetings, be professional, appropriate, and mute when not speaking. When posting on discussion boards, be polite, concise, and avoid using internet slang. If you need an extension on an assignment, please email or message me before

it is due. Students missing more than 4 consecutive assignments may be dropped from the course.
