II. Course Description

This course is a survey of "Western Civilization" since the mid-1600s, although we will concentrate primarily on European societies.

Here is a short list of some of the themes and topics we will follow this semester:

- the development of the centralizing "state" and the birth of the modern notion of the "nation state," which has expanded the claims of the state over new areas of people's lives
- The development of modern science and its application to not only to technology, but also thinking about society (for instance, in the ideas of the Enlightenment and then in the great "isms" of the 19th and 20th century)
- The development of a way of organizing economic activity known as capitalism (and particularly of industrial capitalism), that has created new social classes and conflicts, shaped every aspect of people's daily lives, and led steadily towards "globalization"
- The development of modern concepts of politics, government, and of rights, which have led to conflicts over how and by whom rights are defined and who "gets" them
- The development of intellectual and social movements (or "isms") that have shaped how people understand the world and directed their efforts to change it (for instance, Liberalism, Conservatives, Nationalism, Anarchism, Socialism, Communism, Fascism, etc.).
- The development of new methods by which states and other political/social actors mobilize, control, or eliminate mass populations (for instance, propaganda, warfare, genocide, ethnic cleansing.
