## Fall 2018 Syllabus

**Title of Course**: NURS 234 Medical Surgical Nursing II  

**Course Description**: Focuses on application of the nursing process to care for one or more adult clients and families with acute and chronic multisystem health problems. Clinical learning may take place in acute and community-based facilities, and simulations labs.

**Credit Hours and Contact Hours**:  
Classroom Hours: 3 hours/weekly; theory = 3 credit hours  
Lab/Clinical hours: 96 hours/semester = 2 credit hours  
Total for Course: 5 Credits

**Student Learning Outcomes**:  
1. Select appropriate principles of professional nursing practice that is patient-centered and culturally appropriate for individuals, families, and communities.  
2. Applies principles of teamwork and collaboration to membership in the interprofessional healthcare team for the delivery of healthcare for quality patient outcomes  
3. Analyze nursing care that is evidence based in a variety of healthcare settings.  
4. Report evidence of the principles of quality improvement within a variety of healthcare settings.  
5. Analyze principles of safe nursing practice.  
6. Select appropriate types of technologies for the management of information.

**Required Text (s) and Supporting Materials**:  
- Deglin, Vallerand, Davis’s Drug Guide for Nurses, latest edition, F. A. Davis (or other current drug handbook)  
- Kaplan Resources  
- Blackboard Learn Contents
Course Communication: Effective, ongoing communication is a key element of success in the nursing program. Instructors and staff communicate with students via email when not in class. Students need to check their UNM and Blackboard email accounts regularly. Full-time nursing instructors have voice mail, and communication should take place directly with your instructor. Full-time instructors hold scheduled office hours as posted in their syllabus and outside of their offices, and students may schedule conference times as needed. In addition, there is student representation on the nursing faculty committee, and the representatives are responsible for communicating pertinent information to their classmates. Part-time faculty will identify their preferred method for communication to the students.

Electronic Device Usage: Cellphones and other devices except laptop computers are not permitted in the classroom setting. They must be silenced and put away. Cellphone that ring or are used during class or testing will result in the student being excused from the class or test. Any make-up of assignments or exams due to violation of this policy is solely at the discretion of the instructor. The use of computers is acceptable in the learning context of the class. Lectures may be audiotaped at the express permission of the instructor. Classroom capture is not available at this time.

Clinical Conduct Policies: Cell phones are not permitted in the clinical area including the lab. They are not permitted to be on your person except during breaks or lunch. You may not carry your phone in your uniform pocket during clinical shifts.

Academic Integrity: Having academic integrity is paramount to your success in any class. Plagiarism or cheating is not tolerated. Any instance of this will result in a grade of zero for that assignment. Here is the link to the UNM Academic Dishonesty Policy: https://policy.unm.edu/regents-policies/section-4/4-8.html. The policy states:

Each student is expected to maintain the highest standards of honesty and integrity in academic and professional matters. The University reserves the right to take disciplinary action, up to and including dismissal, against any student who is found guilty of academic dishonesty or who otherwise fails to meet the expected standards. Any student judged to have engaged in academic dishonesty in course work may receive a reduced or failing grade for the work in question and/or for the course.

Academic Dishonesty is defined as:
"Academic dishonesty" includes, but is not limited to, dishonesty in quizzes, tests, or assignments; claiming credit for work not done or done by others; hindering the academic work of other students; misrepresenting academic or professional qualifications within or without the University; and nondisclosure or misrepresentation in filling out applications or other University records.

Classroom Use/Attendance/Professional Behavior: The classroom is available for student use outside of regularly scheduled classes when other classes are not in session. There is a reference area and computers available. In accordance with UNM policy there is no eating or drinking allowed around the computer areas. Students may have water in enclosed bottles during class.
See the current Student Nurse Handbook for complete listing of attendance and professional behavior policies. [https://valencia.unm.edu/academics/nursing/applications/student-handbook-2016.docx](https://valencia.unm.edu/academics/nursing/applications/student-handbook-2016.docx)

| Student Concerns or Grievances: | UNM-Valencia nursing program follows the specific Grievance Procedure as provided in the UNM Valencia Catalog. Prior to participating in the campus procedure, the student is encouraged to review their complaint within the nursing department by following these steps:  
**SBAR**: To be used as a tool for communicating student concerns in a professional manner.  
**Instructions:**  
- The student completes the SBAR using professional language to communicate a concern about classroom, clinical or lab. You may check with your faculty if you are unsure if this process is necessary.  
- Email the completed SBAR to the instructor.  
- The instructor will contact the student after reviewing the SBAR to schedule a face to face meeting to discuss the SBAR. The student should bring a printed copy to the meeting. |
| Students with Disabilities: | In accordance with University Policy 2310 and the Americans with Disabilities Act (ADA), reasonable accommodations are made to all qualified students unless such accommodations fundamentally alter a program or service or place an undue hardship on the operation of the University. If you have a documented disability, the Equal Access Services office will provide me with a letter outlining your accommodations. I will then discuss the accommodations with you to determine the best learning environment. If you feel that you need accommodations, but have not documented your disability, please contact Jeanne Lujan, the coordinator for Equal Access Services at 925-8910 or jmlujan@unm.edu. |
| Equal Opportunity and Non-Discrimination: | In an effort to meet obligations under Title IX, UNM faculty, Teaching Assistants, and Graduate Assistants are considered “responsible employees” by the Department of Education (see page 15 - [http://www2.ed.gov/about/offices/list/ocr/docs/qa-201404-title-ix.pdf](http://www2.ed.gov/about/offices/list/ocr/docs/qa-201404-title-ix.pdf)). This designation requires that any report of gender discrimination which includes sexual harassment, sexual misconduct and sexual violence made to a faculty member, TA, or GA must be reported to the Title IX Coordinator at the Office of Equal Opportunity (oeo.unm.edu). For more information on the campus policy regarding sexual misconduct, see: [https://policy.unm.edu/university-policies/2000/2740.html](https://policy.unm.edu/university-policies/2000/2740.html). |
| Teaching Methods: | NURS 234 will use a variety of approaches to meet the student learning outcomes. These instructional methods may include, but are not limited to interactive lecture, audio-visual materials, guided discussions, group projects, role playing, self-evaluation, written assignments, computer and on-line activities, decision-making exercises, clinical experiences, field trips and observational experiences. |
| Evaluation and Grading Policies: | To successfully complete the course, the student must achieve 1) a minimum of 75% (C) test average 2) a minimum of 75% (C) overall course average, and 3) Pass in the clinical portion (must pass medications calculations test with a grade of 90% and above, two retests is allowed. If student cannot pass the medications calculations test with the three attempts, they cannot attend clinical rotations. Therefore, resulting in a failure of the course). Failure of any one or more of these components results in failure of the course. See the student handbook for progression policies. There is no rounding of any score or course grade (examples: a 74.99% is not rounded to a 75%. A score of 90.99% is not rounded to a 91%). |
The course grade is based on the below listed components. Late assignments will result in a one (1) letter grade penalty for each calendar day the assignment is late. No assignment will be accepted if more than three (3) calendar days late.

- Exams (5) 75%
- Evidence Based Paper 10%
- Care Plan 5%
- Kaplan 10%

Kaplan Policy:
The UNM-Valencia Nursing Program has adopted a comprehensive assessment and review program from Kaplan Nursing. The intent of this program is to provide students with the tools they need to be successful in the nursing program and on the NCLEX-RN. The Kaplan program is 10% of the student’s grade in all nursing courses except HCHS125, NURS242, and NURS110. In NURS242, the Kaplan component is 35% of the course grade and there are no Kaplan points in HCHS 125 and NURS 110. Kaplan also provides both focused review (practice) and integrated (proctored tests). The focused review tests are designed for student self-assessment and provide students with immediate question feedback and rationales. Instructors will direct the students to the appropriate focused review tests in each course. In order to receive credit, students must complete the focused review tests as assigned and during the designated time period specified in individual course syllabi. In order for the student to take the Kaplan integrated test, each student must have completed the assigned online focused review test(s). Grade points for focused review tests are awarded based on the score achieved. The 10% of each course grade allotted to Kaplan will be derived from four sources and totaled for a possible 100 points.

**Total points**

**Focused Review Tests**

Focused review tests are assigned by course faculty. Tests taken at times other than when they are assigned will mean no points are awarded for the test.

**KAPLAN NCLEX-RN® Secure Predictor Exam**

As a part of NURS 242, the student is required to take the Kaplan NCLEX-RN Secure Predictor Exam and achieve a minimum cut score of 65% in a maximum of 2 attempts to achieve full points. The purpose of this test is to predict student readiness for the NCLEX-RN. The full policy on Kaplan point distribution in NURS 242 is in the course syllabus.

All assignments are to be created as a Microsoft Word document and uploaded into the appropriate link in Blackboard Learn. Written work must follow the APA 6th edition guidelines. Refer to the APAP Publication Manual 6th ed. And/or the Purdue Owl website. Font setting must be Times New Roman or Arial at 12 pt.

**Grading Scale:**

**Attendance Policy and Policies on Clinical/Lab Behavior:**

Attendance in both the class and clinical settings is expected of the student. Non-attendance will result in failure of a class. Professional behavior requires the nurse to be accountable for their actions in any setting. Behaviors that are established in the nursing program will prepare the student for the role of graduate and registered nurse. The following policies delineate expected student behaviors:
**Theory:** Classroom attendance is expected. More than two (2) absences in a 16-week course may result in dismissal from the course. Obligations, such as jury duty active military or reserves service, will be accommodated upon verification of such obligations.

If a student is to be absent the day of a scheduled exam, the student must contact the instructor directly, prior to the time of the exam. Failure to contact the instructor directly may result in an unexcused absence and a failing grade for the exam. At the discretion of the instructor, the student may receive a failing grade or the student may be required to take an alternative form of the exam at a time set by the faculty.

---

See the Nursing Student Handbook for all policies and requirements. This syllabus, including the course schedule is subject to change at the discretion of the instructor in accordance with UNM Valencia Academic Policies. In the event there is a discrepancy between the syllabus and the Student Handbook, the current Student Handbook is the authoritative source.
