UNM Code of Conduct:

Students will be disciplined when engaged in any behaviors that "affect adversely the University's educational function, to disrupt community living on campus, or to interfere with the rights of others to pursue their education, to conduct their University duties and responsibilities or to participate in University activities" (UNM-VC 2012-14 Catalogue p. 179)
***This course has a zero-tolerance policy on academic dishonesty and plagiarism**. When found guilty, the student will be dropped from this course and a report will be submitted to the Department Chair and the Dean of Instruction. The same report will be kept in the student's academic file.
• **Academic Dishonesty** includes "but not limited to, dishonesty in quizzes, tests, or assignments: claiming credit for work not done by you or done by others; hindering the academic

work of other students," etc. Any student suspected of academic dishonesty will be subject to the investigative and disciplinary process of UNM (p.29) *.

• **Plagiarism** is intellectual theft. Plagiarism is when you copy an idea or any text that is more than six words from any source, including the Internet or your friends, without citing the source. To avoid plagiarism, you must enclose whatever you copy in quotation marks and cite the source.

• **Mutual Respect** is expected between students as well as between students and the professor. All forms of harassment or abuse will be handled according to the Student Code of Conduct Policy of UNM (pp. 186-188) *.

Respectful Conduct Expectations: I am committed to building with you a positive classroom environment in which everyone can learn. I reserve the right to intervene and enforce standards of respectful behavior when classroom conduct is inconsistent with University expectations [and/or classroom community agreements]. Interventions and enforcement may include but are not limited to required meetings to discuss classroom expectations, written notification of expectations, and/or removal from a class meeting. Removal from a class meeting will result in an unexcused absence. [Insert number] or more unexcused absences may result in permanent removal and a drop from the course (see attendance policy). The University of New Mexico ensures freedom of academic inquiry, free expression and open debate, and a respectful campus through adherence to the following policies: D75: Classroom Conduct, Student Code of Conduct, University Policy 2240 – Respectful Campus, University Policy 2210 – Campus Violence.

Academic honesty and AI Use

Responsible Learning and Academic Honesty: Cheating and plagiarism (academic dishonesty) are often driven by lack of time, desperation, or lack of knowledge about how to identify a source. Communicate with me and ask for help, even at the last minute, rather than risking your academic career by committing academic dishonesty. Academic dishonesty involves claiming that work created by another source is your own original work. It is a Student Code of Conduct violation that can lead to a disciplinary procedure. When you use a resource in work submitted for this class, document how you used it and distinguish clearly between your original work and the material taken from the resource.

Course Policy on Artificial Intelligence Platforms (including ChatGPT)

A large component of the assessments in this course requires critical thinking and synthesis of ideas in writing. Artificial Intelligence (AI) platforms such as ChatGPT could easily be used as a "student proxy" for this work. The danger in letting an AI platform do the synthesis and writing is that the student will not develop these important skills as part of the course learning objectives. Additionally, AI platforms such as ChatGPT are notorious for making things up, and it is difficult to ascertain if the information is correct or not. Therefore, the course policy is for students not to use AI platforms at all in this course. It is critical for students to develop core research and writing skills first before adding AI and other technological tools to their research toolbox. For

additional details on the misuse of AI assistive technology, please go to the Academic Integrity section of the course syllabus.

My expectation is that the work you submit in class is authored by you. We will be developing skills that are important to practice on your own. Furthermore, since these skills are interdependent and build upon each other, using generative AI can get in the way of understanding these skills step by step, which will ultimately prevent you from being able to succeed in this course.

However, while I would prefer you not use these tools to complete the written assignments for this course, AI tools can be helpful resources for thinking, and I encourage students to use them to think through questions throughout the course. Students should use AI tools to augment their understanding and generate ideas, while ensuring that the final work reflects their own analysis, synthesis, and originality.[1]
