STAFF SESSION: 12 PM - 1 PM

During this interactive keynote session, participants will compare different understandings of equity, confront deficit and asset-based thinking, and see case studies of how Hispanic Serving Institutions across the nation have made powerful but nuanced shifts in policies, procedures and programs to improve how they serve students. The session will also ask participants to collectively reflect on their particular assets and challenges as a rural HSI, and what other rural HSIs have done to address equity within similar rural contexts.
